please cancel claim 8 and add claim 28 as recited below.

"28. (previously presented as claim 8) A method of providing a terminal with location-based actions in a communications network comprising: storing at least a first set of location information; associating a terminal action with said first set of location information; and executing the associated terminal action when a current terminal location information is within a specified range of the first set of location information; applying to a comparison between the current terminal location information and the first set of location information a step selected from the group consisting of hysteresis, delay, proximity threshold, distance threshold, signal condition change threshold."
